

PROJECT NAME: Five-City Special Service Vehicle/Mobile Command Center

RECIPIENT: City of Clearfield

LOCATION: Clearfield, Utah

PURPOSE: This request, while submitted through Clearfield City, is on behalf of five cities in northern Utah -- including Clearfield, Syracuse, Clinton, West Point, and Sunset, which represent more than 90,000 people. The funds would be used to assist in the construction of a Special Service Vehicle and Mobile Command Center for use in emergency management and other public safety situations and events. Currently, these communities do not have access to a command center to help manage large public safety and emergency management incidents. Such incidents include natural or man-made disasters, such as a large crime scene incident, hazardous material events, a fighter jet crash from nearby Hill Air Force Base, multi-alarm fires, or train derailments on nearby freight or commuter lines. The center would help provide for needed logistical, on-scene incident command that currently does not exist. It will also support, when needed, other local and county agencies within Davis County, Utah, which has a total population of 295,000.

AMOUNT: \$500,000
